

Java

```
class Solution {  
    public int[] transformArray(int[] nums) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} nums  
 * @return {number[]}  
 */  
var transformArray = function(nums) {  
  
};
```

TypeScript

```
function transformArray(nums: number[]): number[] {  
  
};
```

C++

```
class Solution {  
public:
```

```
    vector<int> transformArray(vector<int>& nums) {  
    }  
};  
-----
```

C#

```
public class Solution {  
    public int[] TransformArray(int[] nums) {  
    }  
}
```

Kotlin

```
class Solution {  
    fun transformArray(nums: IntArray): IntArray {  
    }  
}
```

Go

```
func transformArray(nums []int) []int {  
}
```
